

Powder Containment Shells

PuCS

OPCON manufactures a unique line of visual effects shots designed for use with OPCON Blast Simulators. Every Powder Containment Shell, or "PuCS" for short, is biodegradable and environmentally safe. They are weather resistant, and come in a variety of colors to include: Natural Earth, Black, and CBRN (yellow).

Two additional effects include Nightfire and White Phosphorus. These PuCS use a proprietary blend of components to provide a flash effect more visible in low light environments to enhance training operations at night.

PuCS Blast Effects Products: Pricing Guide

| Smoke Effect Product | Description | Unit/Case | 1 Case | 50 Cases (5% Off) | 100+ Cases (15% Off) |
|----------------------|--------------------------------|-----------|----------------|-------------------|----------------------|
| Earth Impact | Dirt/Earth Effect | 6 | \$18.35 / Unit | \$16.75 / Unit | \$15.95 / Unit |
| Target Impact | Black Effect Vehicle-Strike | 6 | \$23.25 / Unit | \$21.25 / Unit | \$20.20 / Unit |
| Night Fire | Flash Effect - Night Ops | 6 | \$24.75 / Unit | \$23.50 / Unit | \$21.10 / Unit |
| CBRN | Yellow Effect -Chemical Attack | 6 | \$32.50 / Unit | \$30.90 / Unit | \$27.65 / Unit |
| White Phosphorus | White/Sparkle Effect | 6 | \$48.25 / Unit | \$45.85 / Unit | \$41.00 / Unit |

EARTH IMPACT

Earth Impact replicates all ordinance impact points on natural materials.

TARGET IMPACT

Target Impact produces a thick black plume of dust designed to replicate a vehicle or building strike.

NIGHTFIRE

Nightfire uses a flash powder and produces a vibrant flash of light which quickly dissipates. Designed for night operations.

CBRN ATTACK

CBRN is a mixture of yellow powder and flash powder creating an unmistakable chemical attack effect.

WHITE PHOSPHORUS

White Phosphorus utilizes a white powder and magnesium to create a dense, sparkly effect to replicate a "WILLY P" attack.
